

# A Short Guide to Performance Standards for CRM Instructors - v.2 (1/11/01)

*The purpose of the Guide is to establish industry standards for CRM instructors. It gives guidance and information to operators, providers of CRM training and CRM instructors, on the necessary standards of competence.*

*Complete information is provided in the 'Guide to Performance Standards for Instructors of Crew Resource Management Training in Commercial Aviation' dated September 1998. The contexts in the 1998 document differ from those here, which are aligned with those in CAA Standards Document 29 Version 1 dated 18 September 2001. In due course, the 1998 version will be revised to reflect industry experience of instructor accreditation.*

The Short Guide is designed to capture the core points of the main 'Guide' without duplication, although it is more than a summary as some text has been revised. The Short

The Guide describes in detail what needs to be shown and what needs to be known for instructors to be considered competent in each of 3 different contexts:

**Simulator & Base Training                      Line Training                      Ground School Training**

Material in these 3 sub-sections overlaps considerably, but is laid out separately to avoid the need to cross-refer between contexts.

In each of the contexts there are **4 main Areas of Competence** for CRM instructor training.

- A. Designs training
- B. Delivers training
- C. Assesses trainee progress
- D. Continuously improves the effectiveness of the training

The **Areas** are subdivided into **12 Units of Competence**, each of which contains a number of **Performance Elements** and **Background Knowledge**.
